SKILLS

Agentic-AI

LangChain / LangGraph

CustomGPTs

OpenAI

Zapier

AWARDS and Certifications

Innovation Award By President UMT

Which was presented to me by Provost UMT

Introduction to Generative AI Certification by Google which laid strong foundations about Generative AI.

Neo4j Fundamentals

Basics of GraphQL using Neo4j

Increase productivity using AI

Given by Zapier in which they taught how to make AI Automations to increase productivity

Introduction to LangGraph issued by Langchain academy in which they taught how to build AIagents using LangGraph.

PROJECTS

ShopGenie — An AI based shopping assistant agent

Submitted in an international hackathon "AgentCraft Hackathon" organized by Diamant AI and LangChain. Got accepted in top25 submissions and became an open source contributor to the Agentic-AI community.

Sage – An AI research assistant agent

SAGE is a research report generation tool that uses AI to produce comprehensive reports on any given topic. It leverages natural language processing models to create AI analyst personas, conduct interviews, gather contextual data, and finally compile reports with introductions, conclusions, and detailed content sections.

Whisperer – An AI Text summarizer agent

It's a text analysis based AI Agent which can summarize a text given of less than 500 words into a one or two line summary. I primarily made it to get a summary of news in one line due to lack of time.

My CS Tutor – CustomGPT for 2nd Sem BSCS students

For BSCS second semester computer science students.Covering subjects like OOP, discrete structures, DLD , english ,islamiyat Calculus-2 and pre-calculus.Complete guidance and in depth explanationAlso provides links to related topics for further understanding.

Expense Manager – CustomGPT for Managing and keeping record of expenses

Its main purpose is to keep a record of your expenses in a seamless way and it also notifies its user by sending it an email of the expense as per to notify the user.

Cloud Essentials - Knowledge Badge Readiness Path

AN AWS certification aimed to teach Basics of cloud computing using AWS.

Introduction to Large Language Models

Issued by Google which laid foundations about what an LLM is and how it operates

LANGUAGES

English, Urdu , and Punjabi
